4W, TIMOR-LESTE (URE - RadioSolidaridad Press Release)

The following was received last week from "URE - RadioSolidaridad":

> "The Union de Radioaficionados Espanoles, URE, (The Spanish Amateur Radio League) is proud to announce a project in East Timor to take place in June 2008. URE's Radiosolidarity Department will organize an Amateur Radio DXpedition, combined with activities to promote Amateur Radio including the donation and setting up of a complete amateur radio station at the University of Dili. It is hoped that by operating alongside students and teachers of the Electrical Engineering and other departments it will be possible to sow the seeds of future amateur radio activity of a permanent nature in East Timor.
>
> During the last few years URE's Radiosolidarity has been involved in projects in the following countries:
> 1998-TJ2RSF-Cameroun [in collaboration with RSF]
> 1998/1999-Cuba [campaign of donation of material]
> 1999-HU4U-El Salvador
> 2000-HQ0R-Honduras

2001-TG0R-Guatemala
2003-ZA1A-Albania [an IARU project]
2004-7W0AD-Algeria
2004-T42R-Cuba
2005-TZ6DEL-Mali
2007-T42R-Cuba
2007-HQ2R-Honduras

This new project will take place in cooperation with the University of Dili, located in the capital of East Timor. We don't yet know the callsign that will be used; whether it will be a special one for the occasion, hopefully 4W6R, the callsign of the University (4W6UTL) or the callsign of one of the operators (4W6ERC).

The group that will take part in the activity is made up of the following experienced operators:
EA1QF Angel (team leader) EA4KA Eugene
EA3CUU Pere EA5BWR Txema
EA4DB (ex-EA4BPJ) Jose CT1ERC Jose

QSLs will be via EA4URE.

A complete station (Kenwood TS690 + Mosley TA63M + G5RV + rotor) will be donated to and installed at the University of Dili for use of the students and teachers of the Electrical Engineering Department or anyone else who might be interested in Amateur Radio. Another station will be set up, temporarily, at the team=B4s lodgings in order to have two stations (CW and SSB) operating permanently during the 15 days of operation. Time will be spent on other modes (RTTY, etc) and special attention will be paid to operation on six meters.

The majority of this project`s funding is provided by the Alicante Provincial Government and by URE. The rest of the budget, at this time, will be down to the operators although we have already received news of some small but useful donations. We would be very grateful if individuals and organizations could consider making contributions to this project at any time, including after the operation. Please bear in mind the following two considerations.

The objective of this project is to contribute to the development of a very young country and to promote amateur radio activity by East Timor nationals.

The DXpedition part of the activity is intended to achieve 30,000 plus QSOs in spite of the limitations imposed on us. We feel able to achieve this due to the very considerable experience of our six-man team of proven DXpedition operators."

FR/G, GLORIOSO ISLANDS

Jean-Michel, F6AJA, editor of Les Nouvelles DX, informed OPDX on Monday last week that after many years of effort, the permission has finally been received and an operation to Glorioso (Glorieuses) Islands will take place, probably early May (possibly between May 5-9th) for some weeks. At the moment, operators mentioned are Pascal/F5PTM, Freddy/F5IRO, Stephane/F6KIN, David/F8CRS, Yves-Michel/ F5PRU and possibly 3 others. The team plans to have 3 or 4 stations on the air. They are currently looking for sponsors, and if you would like to help, please contact Didier, F5OGL. Presently, Glorioso is ranked 4th in "DX Magazine's 2007 Most Wanted Countries World-Wide" in the mixed modes (EU 7th, Asia 9th and NA 4th). There is no Web page currently available for this operation, but details from the 2005/2006 planned operation Web page (which did not take place) states:

"The Glorioso Archipelago consists of two coral islands: Grande Glorieuse (3 km in its larger

diameter) where the human installations are, and Ile du Lys (circular island, 600 metres in diameter) which is desert. The archipelago also includes two rock islets - Roches Vertes and l'Ile aux Crabes - as well as a sand bank more or less above water at high tide. At the east and northeast of Grande Glorieuse are a series of dunes reaching a maximum elevation of 12 m. The islands and rocks are surrounded by a reef and a lagoon which is drained dry at low tide. The Glorioso islands are situated 220km northwest of Diego Suarez (Mada- gascar).

The island became French territory in 1930. Around 1912, a French came from the Comoros and planted a fine coconut palm plantation there. Exploited until 1958 by people from the Seychelles, it is currently abandoned. There are also filaos. Fauna consists exclusively of a rather large colony of terns.

The meteorological service of the French colony in Madagascar installed on the island a rather primitive weather station in 1955 which was opened only during the hurricane season from October to April. Since 1960 the the station is open all year round. The importance of this station is clear. It predicts cyclones for the North Madagascar and Comoros area. It ensures safe navigation on the Madagascar-Djibouti- Madagascar and Kenya-Mauritius-Kenya air and maritime routes. (From minister for the French overseas Web site)"

ADDED NOTE: Jean-Michel, F6AJA, provides DXers with an interesting Web page that (probably) has the most complete QSL collection (28 different QSL) from Glorioso. Take a look at:

http://lesnouvellesdx.fr/galerie/galerie2.php?page=topten&pfx=FRG

He still needs some cards for his collection: FR5ES/G, FR5HG/G and FR5KH/G.

MEGA DX PEDITIONS HONOR ROLL

Jari, OH2BU, has put together and maintained an interesting Excel spreadsheet over the last 12 years called - The "Mega DX Peditions Honor Roll". This Honor Roll listing currently includes data of 114 DXpeditions that have worked 30,000 or more QSOs since 1979. This unique listing includes data on:
- A summary on the DXpedition (dates, length, QSOs, stations..etc.)
- Information on Logs, Web site, QSL routes and if it is in LoTW
- List of operators of the DXpedition

- Also continental, band and mode records

The whole purpose of this listing is to help future DXpeditions in planning their next operation, and to understand the possibilities in making QSOs to different continents and to optimize their efforts.

The following is the currently "TOP TEN DXPEDITIONS ON THE HONOR ROLL":
